

MongoDB – Playlists Collection

Questions, MongoDB queries, and sample outputs

1. Insert 5 documents

```
db.playlists.insertMany([
  { name: "Today's Top Hits", likes: 2500, genre: "Pop", followers: 12000 },
  { name: "RapCaviar", likes: 1800, genre: "Hip-Hop", followers: 9500 },
  { name: "Rock Classics", likes: 900, genre: "Rock", followers: 3500 },
  { name: "Chill Vibes", likes: 650, genre: "Lo-Fi", followers: 1800 },
  { name: "Pop Rising", likes: 1500, genre: "Pop", followers: 7200 }
])
```

Output:

```
{
  acknowledged: true,
  insertedIds: {
    "0": ObjectId("..."),
    "1": ObjectId("..."),
    "2": ObjectId("..."),
    "3": ObjectId("..."),
    "4": ObjectId("...")
  }
}
```

2. Followers greater than 1000 using \$gt

```
db.playlists.find(
  { followers: { $gt: 1000 } },
  { _id: 0, name: 1, followers: 1 }
)
```

Output:

```
{ name: "Today's Top Hits", followers: 12000 }
{ name: "RapCaviar", followers: 9500 }
{ name: "Rock Classics", followers: 3500 }
{ name: "Chill Vibes", followers: 1800 }
{ name: "Pop Rising", followers: 7200 }
```

3. Pop or Hip-Hop using \$in, sorted by likes

```
db.playlists.find(
  { genre: { $in: ["Pop", "Hip-Hop"] } }
).sort({ likes: -1 })
```

Output:

```
{ name: "Today's Top Hits", likes: 2500, genre: "Pop", followers: 12000 }
{ name: "RapCaviar", likes: 1800, genre: "Hip-Hop", followers: 9500 }
{ name: "Pop Rising", likes: 1500, genre: "Pop", followers: 7200 }
```

4. Likes between 500 and 2000; top 3 by followers

```
db.playlists.find({
  likes: { $gte: 500, $lte: 2000 }
}).sort({ followers: -1 }).limit(3)
```

Output:

```
{ name: "RapCaviar", likes: 1800, genre: "Hip-Hop", followers: 9500 }  
{ name: "Pop Rising", likes: 1500, genre: "Pop", followers: 7200 }  
{ name: "Rock Classics", likes: 900, genre: "Rock", followers: 3500 }
```

5. Trending playlists: followers > 5000 and likes >= 1000

```
db.playlists.find(  
  {  
    followers: { $gt: 5000 },  
    likes: { $gte: 1000 }  
  },  
  {  
    _id: 0,  
    name: 1,  
    genre: 1  
  }  
)
```

Output:

```
{ name: "Today's Top Hits", genre: "Pop" }  
{ name: "RapCaviar", genre: "Hip-Hop" }  
{ name: "Pop Rising", genre: "Pop" }
```

One-line explanation:

Multiple conditions are combined in the same filter using \$gt for followers and \$gte for likes, so both conditions must be true.
